

FileBound for K-12 Education

FileBound streamlines student services for K-12 educators and administrators by providing secure and reliable access to critical student information and interfacing directly with their SIS and ERP to ensure immediate adoption across faculty and administrative staff.

From district office processes to parent and student facing programs, FileBound is a single-system solution to coordinate efficiencies across any district department.

## Online Permission Forms

*FileBound offers schools a comprehensive, online solution that's convenient for families and simple for staff to manage. Whether sports waivers, medical releases, or permission for the upcoming field trip, simplify the permission process by giving parents access to online forms and digital signatures.*

### CONVENIENT

Online access eliminates lost slips and gives parents accessibility that's convenient for them.

### DIGITAL SIGNATURES

Forms can be signed digitally or, if a legally binding e-signature is needed, FileBound's comprehensive integration with DocuSign can be used.

### NOTIFICATIONS

Submitted forms are delivered straight to the teacher or administrator, with confirmations going back to the parent to acknowledge receipt.

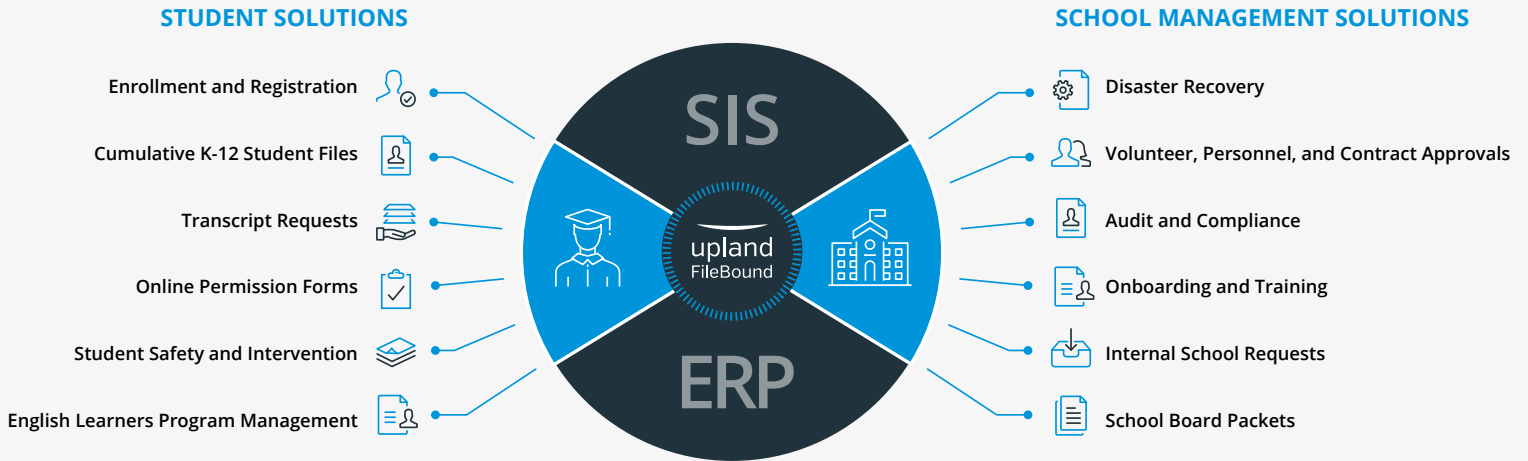

### MOBILE ACCESS

Mobile access ensures faculty or staff can get to pertinent student information, like medical records or emergency contact numbers, no matter where they are.

Online permission forms - whether posted on the district's web site or simply emailed directly to parents or guardians - are easy to access and convenient for both the district and it's families. Parents can upload documents like medical releases or doctor notes along with the permission slip, and are sent confirmations upon submission.

Submissions are automatically saved into FileBound, associated with the student's file, and directed to the appropriate faculty or staff member for review. Mobile access gives coaches and teachers the ability to immediately retrieve student medical or emergency contact information should an issue or emergency arise on the field or at the event.

# Why choose FileBound?

## A District-wide Solution.

Paperwork is bad enough - make your systems work *for* you by incorporating FileBound with your SIS and ERP to empower faculty and staff with immediate access to the information they need every day.

### Benefits

#### Safeguard

Enforce disaster recovery and protect student privacy by enforcing rules and security protocols specific to the faculty, staff, or administrator need.

#### A Standard, Automated Process

Automated processes provide predictability and accountability. System tracking and reports give staff immediate insight into how far along the enrollment process a student is, and what's left to finalize their admission.

#### Interface Integration

FileBound interfaces with existing SIS and ERPs, making it simple for staff to manage and promotes quick adoption throughout the district.

#### One Solution

Providing staff a single system for efficiencies eliminates training and adoption concerns for several one-off systems - not to mention the cost savings of a combined solution!

*We help districts focus on providing students and their families with the best services and resources possible by streamlining processes, organizing data, and ensuring staff has access to required information.*
